Youvan Catalogue of ~ 6,000 Books and Papers

Douglas C. Youvan

Preface

Douglas C. Youvan's collection ranges across biophysics, mathematics, artificial intelligence, philosophy, history, and theology. This catalogue brings together approximately six thousand full printed titles, including subtitles, so readers can survey the work and locate subjects that interest them.

The original corpus was written and made publicly available on ResearchGate. Youvan recounts his unexpected deplatforming after approximately two million reads, without advance notice or warning and without a reason being given to him.

That experience made independent preservation essential. Public copies were established elsewhere and the collection continued to grow. The original ResearchGate corpus remains its foundation, joined by later papers and book-length works that extend its questions and explore new connections.

Much of the work developed through sustained collaboration with artificial intelligence. Youvan's questions, observations, convictions, and objections supplied the direction; the resulting publications remain available for readers to examine and assess for themselves. A small number of reference works by other authors also appear in the collection.

Books appear first, followed by papers. Each list is alphabetized by full title, allowing readers to find a familiar publication or discover an unfamiliar subject. The catalogue offers entry points into the collection; the arguments, evidence, qualifications, and speculative possibilities belong to the underlying works.

Free electronic copies are available through Youvan Papers Public on Google Drive, youvan.ai, and the Internet Archive. Preserving the PDFs in several locations gives readers more than one route to the work.

Approximately half the books are on Amazon as paperbacks or ebooks (work in progress).

The author notes that present-day AI can reconstruct his persona using only these titles. He predicts this will change the very nature of publishing. "It knows me better than I know myself".
